TO THE GOVERNOR AND MEMBERS OF THE LEGISLATURE:

Transmittal

I submit herewith the Fifteenth Annual Report of the Division of Local Government covering the fiscal year January 1 to December 31, 1952, pursuant to the provisions of chapter 112, P. L. 1944, which require "the Director to publish annually a report of comparative financial statistics of Local Government tabulated to show the costs of government, the costs of principal services, the amount of debt and other pertinent data."

Comparable 1938 to 1952

The schedules in this report closely follow those of preceding years, thus permitting comparable studies for a fifteen-year period.

Source Material of Report

The statistical data contained herein have been assembled from reports of audit wherever possible and in all other cases from financial statements prepared by the chief financial officer of the municipality. In order to complete this report without undue delay the financial statements have been used where the audit report was not available.

Scope of Report

Following last year's procedure, certain changes will be found in the text following this letter of transmittal. The first section of this text will deal with "Explanatory Terms, Titles and Definitions," followed by a section dealing with "Comparative Statements and Summaries."

Number of Municipalities

This report covers the transactions of the 588 local government units of New Jersey, consisting of 21 counties, 53 cities, 21 towns, 257 boroughs, 235 townships and 1 village.

Alphabetical Sequence—County—Maps

For convenience and quick reference, material is presented in alphabetical sequence with a separate section for counties.

A map of each county showing the location of the various municipalities therein will be found immediately in front of the detail relating to a particular county.

The name of each municipality is followed by the form of government, i.e., city, town, borough, etc., together with 1950 population figures, land area and net valuation taxable.

SUMMARY

One Page Devoted to Each Municipality

In summary, an attempt has been made to present a comprehensive picture of the current financial position of each county and municipality and in so doing, I have assembled pertinent information on a single page excepting data on municipally owned utilities, which appear in a separate section of the report. I have endeavored to comply with the statutory requirements and present a report of comparative financial statistics of local government and at the same time present the material in such a way that anyone not familiar with municipal finance may interpret and analyze the several statements. The 1952 budget operations as reflected by the statement of revenue and expenditures shows the costs of various governmental functions, singly and in total. These figures have been set up in conformity with a classification schedule in general use through the United States and while the larger units may be susceptible to further breakdown, uniform classifications have been used throughout this report.

I feel that this report would be incomplete without a word of commendation for Frank E. Maimona, Statistician, who has handled all of the detail contained in this report. Likewise, other members of the staff who have assisted in the work are entitled to special mention. In addition, I am indebted to the Department of Conservation and Economic Development, Division of Planning and Development, for the use of the County maps appearing herein.

Respectfully submitted,

WALTER R. DARBY,
Director of Local Government.

EXPLANATORY TERMS, TITLES AND DEFINITIONS

Municipal Fiscal Year

The fiscal year for all counties and municipalities is the calendar year.

Statements of Expenditures and Required Payments

In compliance with that part of the statute which requires a tabulation showing costs of government and the costs of principal services in comparable form, a statement of expenditures which reflects the budget results of the year, is used.

Expenditures

The term expenditure includes not only cash disbursements, but in addition, amounts reserved to meet unpaid claims of the current fiscal year.

It will be noted from the foregoing that Amounts Reserved to Meet Unpaid Claims of a current fiscal year are added to the actual cash disbursements in this report. The unexpended balance of an appropriation (even though it may be uncommitted) is reserved under New Jersey statute regardless of the amount of the actual commitments against such reserve. The net result is that the amounts reserved at the end of a fiscal year are considerably in excess of the actual commitments of such fiscal year. It may be argued that this excess reserve produces an erroneous picture insofar as expenditures are concerned. However, few municipalities maintain complete requisition systems and it follows that reporting expenditures in excess of the actual disbursements makes for sound finance. In other words, the fact that a portion of the amount considered as an expenditure or charge remains unused at the end of a fiscal period strengthens the eventual financial position of the municipality.

Deferred Charges and Statutory Expenditures

This title includes amounts appropriated to cover over-expenditures, emergencies, judgments, or any items of a mandatory nature occurring in a prior period and required to be met in a current period. The major items incorporated in this classification are emergencies and expenditures without appropriations.

Emergency Appropriations

The New Jersey statutes provide that emergency appropriations may be created by resolution for the purpose of meeting an emergent condition unforeseen, or for which adequate appropriation was not made in the current budget. These appropriations must be created by

a resolution adopted by two-thirds vote of all the members of the governing body, and where the amount exceeds three percent of the operating budget require the approval of the Director of Local Government. It is mandatory that all emergency appropriations be included in the budget of the next succeeding year. The expenditures under emergency appropriations are subject to the same classification as to purpose as an original appropriation. Thus, in this report, emergency expenditures of 1952 are in no instance separately classified. A subsequent comment, however, illustrates the extent to which these are financed by emergency notes. All of these emergency appropriations are cleared by specific appropriation in the 1953 budget and will fall in the "Deferred Charge and Statutory Expenditure" group.

During 1952 municipalities declared emergencies aggregating approximately \$4,985,918 and thus created emergency appropriations for the foregoing amount of which \$317,450 were financed by borrowings and the balance from funds on hand. These appropriations were for water and other utilities, garbage and ashes, fire protection, roads, streets and bridges, police, health, housing, parking meters, poor, schools, etc.

Reference should be had to a preceding section of the report for an outline of the procedure followed in making and liquidating emergency appropriations.

Emergency Borrowings

Emergency appropriations may or may not be supported by borrowings. If a municipality has sufficient current funds to support an emergency appropriation, recourse need not be had to the issuance of emergency notes. On the other hand, a municipality may, if it so elects, issue emergency notes to support an emergency appropriation. In either event, there must be an appropriation in the succeeding year's budget to clear the emergency.

Required Payments for Local, School, County, and Special District Taxes

This figure is broken down under the caption of "Taxes" where the respective amount of each requirement is shown. Attention is directed to the comment on "New Jersey Tax Billing and Collecting Procedure," also to the comment on "Local Purpose Taxes" which follow.

New Jersey Tax Billing and Collecting Procedure

A word of explanation is needed at this point relative to the method of tax billing and collecting in New Jersey. Property is assessed for taxing purposes as of October 1 of the year preceding that for which the tax is levied. The municipal budget determines the tax requirements of the *municipality*. The local school budget determines the tax requirements of the local school district. The county budget fixes the

amount due for county purposes and the county tax requirements of each individual municipality are determined by an apportionment of the county tax requirements by the county tax board.

The several requirements are added together and thus become the total tax levy of the municipality. The local collector submits a single bill for county, local school and local requirements. Taxes are payable in four installments and the taxing district must make mandatory payments to the school district and to the county. What remains is available for municipal purposes. Thus, it is easy to see that failure to collect taxes may leave a municipality without funds with which to operate. From the taxpayers standpoint, the method is clean-cut to the extent that he receives only a preliminary bill and a final bill and when he makes payment, he has satisfied all of the requirements of the county, local school district and local municipality.

County Taxes

This is the amount required to be paid by the municipality to the county for its ratable share of the county tax levy as apportioned by the county tax board.

State Taxes

No direct State property tax was levied for any purpose for the year 1952. The last report to reflect a State Tax was that of the year 1946. This was a 2.9-mill tax levied on the assessed valuations of each municipality, collected in the municipality paid to the county, which in turn paid the tax to the State. 90% of the tax was returned to the county immediately and distributed to the respective school districts in the county on the basis of average days attendance. The New Jersey corporation business tax acts of 1945 and other revenues made it possible to eliminate any direct State levy since 1946.

Local School Taxes

Local school taxes represent the amount required for the support of local district schools which, in all except what are known as Article VI or so-called city districts, are governed by a corporation separate and distinct from the municipal corporation. The school year runs from July 1 to June 30, however, treating the local school levy as a required payment without adjustment creates no confusion insofar as this report is concerned, furthermore a number of school districts are now levying taxes on a calendar year as permitted by statute.

Local Purpose Taxes

Every municipal budget is balanced by what is known as a Local Purpose Tax. The Local Purpose levy appears under the heading of "1952 Tax Requirements" and a comment appears on page VIII of the

report dealing with this item. This item loses some of its identity due to the fact that under a cash basis accounting procedure it is submerged in the financial set-up; however, this local purpose levy is that portion of the total levy which is under the jurisdiction of the local officials. This item was given its proper place in the budget form prepared by the Division beginning with 1952.

The Local Purpose Tax is of prime importance in the preparation of the municipal budget and this report has been prepared in such a manner that the item is given due prominence.

Statement of Receipts and Revenues

As an offset to the expenditure statement, a statement of receipts and revenues which reflects the end of the year budget results on the income side of the budget is used. Actual receipts which are available to meet expenditures and required payments may be determined from the statement of revenues. The revenue figures shown in this report represent cash receipts in all instances except in the case of surplus revenue and State Aid. Surplus revenue may in part be offset in deferred charges and State Aid may be represented by State funds set aside for the municipality but not yet paid over.

Revenue Accounts

Revenue accounts referred to above are defined herewith in order to clarify their meaning to anyone not familiar with New Jersey municipal finance.

Surplus Revenue:—Represents free cash used to support the current budget after providing the amounts required to meet the cash liabilities at the end of the previous year and the amount of non-cash surplus permitted to be used to offset deferred charges which are required to be cleared by budget action. It does not represent the current cash balance at the close of the previous year except in very unusual cases.

Miscellaneous Revenues Realized:—Represents cash receipts from such sources as:

- Licenses
- Fees and permits
- Fines (magistrates, etc.)
- Interest and costs on taxes
- Interest and costs on assessments
- Interest on deposits
- Franchise tax
- Gross receipts tax
- Bus receipts tax
- State aid
- Sundry receipts

State Aid to Municipalities for the year 1952 plays an important part in the miscellaneous revenue picture. Chapter 62, of the Laws of 1947, provides that municipalities might anticipate State Aid for current road repairs, street lighting and capital road construction. Statutory emphasis was placed on this State Aid being used for current repairs with the result that many municipalities anticipated a substantial portion of the \$5,770,000 appropriated by the State under what is commonly known as a "Formula" program with the result that this revenue has materially increased the miscellaneous revenues available to support the current budget. In previous years, substantial portions of State Aid made available to municipalities were handled through municipal ordinance rather than through the current budget, but beginning with the year 1948 a great part of the \$5,770,000 referred to above is reflected in current miscellaneous revenues.

Reserve for Uncollected Taxes

It will be noted that the expenditure and required payment group shows a total captioned "Total All Expenditures and Required Payments" which figure excludes the "Reserve for Uncollected Taxes." This "Reserve for Uncollected Taxes" is not a cash requirement and while it is an integral part of the budget it should not be considered in determining cash requirements. This reserve is an amount added to the required levy; and will, based upon the estimated collection of current taxes, provide the cash required for operations and required payments.

Significance of Unbalanced Totals

A comparison of the total expenditures and required payments with the total receipts and revenues realized indicates the extent to which receipts support expenditures. Under the cash basis of operations an excess of receipts means that there is a surplus which may be availed of to support budgets of subsequent years; and a deficiency of receipts means that the deficit must be provided for in the budget of the succeeding year. Any attempt to use balanced totals in this report would materially delay the completion thereof.

Capital Outlay

A Statement of Capital Outlay follows the Statement of Receipts and Revenues. This is subdivided under several captions. This statement first appeared in the 1945 report and the transactions reported represent expenditures from bond funds. "Capital Outlays" financed from budget appropriations in the current or operating division of accounts first appeared in the 1947 Report; this procedure is continued. Heretofore certain capital items were financed through the budget and classified as an expense item. This separate classification,

it is anticipated, will be the first step in reporting on capital outlays financed wholly from current budget appropriations. It will be noted that a separate heading appears in the Operating section for "Capital Improvement Fund." This does not represent a direct outlay for capital purposes, but is in the nature of a down-payment fund which can only be availed of through ordinance. This Fund may be expended in the year in which the appropriation is made or may be accumulated and held for future capital purposes.

Tax Rates

A breakdown of tax rates is shown for each municipality. This breakdown shows that portion of the rate applicable to county, local district school and local municipal purposes. This computation is based on figures appearing in the printed "Abstract of Ratables" and can be checked to that source. It is believed that this breakdown will be of interest to students of municipal government and taxpayers.

1952 Taxes Levied

An analysis of the several purposes for which taxes are levied will be found under the foregoing caption. It will be noted that taxes levied are broken down under the headings of Local School, County, and Special District Taxes. These several items represent mandatory requirements. Attention is directed to page IV, "New Jersey Tax Billing and Collecting Procedure," which will give a general idea of the method of levying and collecting taxes under the New Jersey statutes.

The local purpose levy which is set forth as a separate item represents the amount required from general taxation to operate and maintain the municipality and provide for municipal debt service. The sum total of the several items gives the total tax levy for all purposes.

The figures set forth under "1952 Taxes Levied" are taken from adopted budget figures adjusted to the "Abstract of Ratables" of the several counties. This "Abstract of Ratables" is in effect the printed record of the several tax rolls or "duplicates" as they are defined in the New Jersey statutes.

The budget as adopted reflects a Local Purpose Levy, which is shown in this report, but which by statute may be adjusted when the tax levies are fixed. Deficiency in basic aid and school debt service are included in the adopted budget of the municipality but are deducted from the local purpose requirements and added to the local district school tax levy when the County Board strikes the tax rate. The totals of the figures appearing in the printed abstract of ratables will be in agreement with the "*Total Tax Levy (Tax Duplicate)*" but individual requirements for local district school and local purposes may not agree.

Theoretically the total of "1952 Taxes Levied" should agree with the 1952 levy appearing under "Current" taxes. Practically there

will be variations due to fractional rates and to the fact that taxes may be added during the year. Fractional rates should always produce a slight variation, but where there are more than nominal changes these will undoubtedly be due to taxes added under what is known as chapter 397, P. L. 1941.

Early reports did not give due recognition to the "Local Purpose Levy" which figure represents the amount under the direct control of the municipality and to a greater or lesser degree affects the tax rate.

It will be noted that all tax rates are carried out two places in this report whereas the printed abstracts of the several counties carry these rates several places further. The New Jersey statutes call for a rate on the hundred dollars of valuation and it is established practice to carry no rate beyond two decimal places. For example, a rate of 4.7719 is carried as 4.78—always to the next higher cent on the hundred.

Current Taxes—1952 Collections

This figure represents 1952 cash collections from the 1952 tax levy. The current collection figure appears on both the Statement of Receipts and Revenues Realized and the Statement of Taxes.

Delinquent Taxes Including Liens

This represents 1952 cash collections on all prior years' taxes including tax title liens which were unpaid at the beginning of the year 1952. In the statement entitled "Taxes" a distinction is made between prior years taxes and tax title liens, while in the Statement of Receipts and Revenues no such distinction is made.

"Prior Years' Taxes," "Tax Title Liens" and "Property Acquired by Deed or Foreclosure" are shown in condensed form. Balances at the beginning and end of the year are shown together with "Cash Collections" or "Cash Sales." There are other changes such as transfers, cancellations, etc., affecting these items but the true index of activity is the cash derived from these sources, and it is felt that the omission of other than cash figures does not in any way lessen the value of the statements.

Tax Title Liens

Taxes on real property remaining unpaid on July 1st following the year of levy are required to be included in a tax sale. The holding of a tax sale is mandatory and attention is directed to the paragraph which follows relative to what happens after a sale is held and there are no outside purchasers.

Foreclosed Property and Property Acquired by Deed

This asset is created through the foreclosure of tax title liens. When real estate taxes are unpaid the collector is charged with the duty of selling the same for non-payment and if there is no outside purchaser, the property is struck off to the municipality and the tax

title lien is vested in the municipality. At any time after two years from the date of the tax sale the municipality may in accordance with law foreclose the right of redemption through our courts and when such right to redeem is foreclosed the municipality acquires title in fee. This property then becomes municipal property subject to sale by the municipality. The property is withdrawn from the ratables when foreclosed and is not restored thereto until sold.

Prior to 1946 the asset figure was the accumulated municipal charges against the property. In 1947 the asset figure carried on the books of the municipality was changed to the last assessed valuation shown in the records. This change should theoretically reduce the asset value of foreclosed property, but will produce a figure which will be more in accord with sale prices in the majority of cases. The growth of the foreclosed property asset indicates that the disposition thereof is one of the important problems of the municipalities.

While tax title liens, in the main, are created as a result of non-payment of real estate taxes, liens may be created through the sale of delinquent special assessments, utility charges or special district taxes. Where the property is included in a tax sale and a tax title lien comes into existence, the power of foreclosure exists whether the lien results from a delinquent tax, a delinquent assessment or other delinquent charge. Regardless of the source of the delinquent charge the purchaser has the power to foreclose after the two-year period has elapsed on any municipal lien.

In some instances complete information relative to the activity in this account will be lacking due to the fact that the figures are taken from the financial statements of the municipalities direct rather than from the reports of audit.

Capital Debt

Under the caption of "Capital Debt" are set forth school debt, self-liquidating or utility debt, and other capital debt. Under the New Jersey statutes, the aforementioned figures represent indebtedness whether issued and outstanding or authorized but not issued.

Under deductions will be found school debt, self-liquidating debt, and other deductions. School debt, except in the case of city school districts, is the indebtedness of a separate corporation. (In the case of city districts, school debt is an obligation of the municipal corporation and the payment thereof is provided for by the municipality, whereas in other districts the payment is provided for by the school corporation.) The statutes in all cases permit deductions for school debt up to 6% of the three next preceding years' average assessed valuations of real property (and 8% in those cases where there is a certified high school). Thus, it will be noted that the full amount of school debt is deductible except in those cases where it exceeds the 6% (or 8%) average.

Self-liquidating or utility debt is deductible as a whole where the utility is entirely self-sustaining. In those cases where the utility is not self-sustaining, the operating deficit is capitalized at 5% and becomes a charge against the debt limit of the municipality.

The deductions for capital debt come about mainly through sinking funds or funds in hand applicable to the gross debt, and amounts owing by other governmental agencies. It follows that indebtedness which is authorized for the purpose of funding or refunding already existing debt may appear as a deduction. The debt limit in New Jersey is 7% of the average of assessed valuations of real property including improvements for municipalities and 4% for counties.

It will be noted from the reports that the percentage of debt is in excess of the 7% limit in a number of cases. This has come about through the funding of floating debt, the incurring of debt through an order of a superior governmental authority and in some instances through the change in the method of computing net debt as provided for in the 1935 Bond Act revision (under the previous statute, utility debt was deductible regardless of whether or not the utility was self-sustaining and special assessment debt was also deductible. Thus, with the passage of a statute eliminating such deductions, a number of municipalities were automatically over the debt limit.) A municipality with indebtedness over the limit may incur new debt only within the limitations of the statute. In brief, these are the order of a superior governmental authority such as an order of the board of health to construct a sewer, capital debt for emergency purposes such as fire, flood or other disaster, the refunding of floating debt with the consent of the State Funding Commission, and the incurring of general debt based on the amount of debt retired in a prior year. The latter is a limited power provided by statute to take care of cases where certain capital expenditures should be incurred which do not fall in any of the exempted classifications.

Capital Outlay

A statement of Capital Outlay appears in this report. This statement, which is broken down under the following captions: Beaches and Boardwalks, Buildings and Equipment, Parks and Playgrounds; Sewers; Streets, Roads and Bridges, Water Supply and Other Purposes, represents amounts paid in cash from capital or bond funds in 1952. In the main, these capital funds are derived from the proceeds of the sale of bonds or bond anticipation notes and the amounts reported represent actual cash disbursements; no attempt has been made to record capital commitments.

Capital outlay in the Current Division of accounts is reported in a separate classification appearing in the expenditure statement under the heading of Capital Improvements and Capital Improvement Fund.

Several inquiries as to the fact that no expenditures appeared under the caption of "Streets and Roads" for "New Construction" call for a word of explanation. Present budgeting for this purpose places it under "Capital Outlay" in the current budget where financed by taxation directly. Previously it was set up as a separate item under "Streets and Roads." I hope to be able to provide details of this in a subsequent report.

Utility Operations

Every municipally operated utility or enterprise must maintain a separate set of accounts. If the utility is entirely self-sustaining and if there is a surplus, such surplus may be used to reduce current taxation. If the utility operates at a deficit, general taxation must provide the necessary funds to meet such operating deficit. The use of surplus to reduce the current tax levy is permissible while the budgeting of deficits in the current tax levy is mandatory. As stated elsewhere in this report, the extent to which the utility is self-liquidating determines the amount of the capital debt which is deductible in any debt statement. (In addition, it may determine the amount of new utility debt which may be incurred.) Statements appear on pages 569-572, inclusive.

Every utility must make a budget, which is separate and distinct from the general operating budget of the municipality. The figures shown under expenditures and required payments represent cash disbursements together with appropriation reserves. The receipts represent cash only.

Special Assessments

There has been inquiry as to why figures dealing with special assessments for benefits have not been incorporated in this report. The present Local Bond Law allows no deductions for benefit assessments, thus many improvements which were previously undertaken as local improvements due to the fact that the indebtedness could be created without affecting the debt limit of the municipality are not undertaken. While improvements are being assessed against property specially benefited, the volume does not assume the importance that it did in the 1925-1929 period.

Special District Taxes

The New Jersey statutes provide for the levy of special district taxes under certain conditions. In the main, these have to do with fire and light districts in townships. In addition, there are a limited number of sewer, garbage, and other special districts. No attempt has been made to report on these districts. Tests made some years ago indicated that the over-all costs of operating these several districts were nominal compared with other municipal requirements and while the required payments to the special districts appear in the report, no detail as to

operating expenditures is shown. In the case of fire districts, no reports are filed with the Division; thus it is impossible to present detail covering the costs of fire district operations and the other districts are limited in number and the amount of money required. A district tax levy represents a special levy imposed upon a portion of a municipality (usually a township) for the rendering of a certain service. The balance of the municipality is not liable for this tax. Furthermore, the municipality is not liable for the obligations of the district.

"Cash Deficits"

While the term "Cash Deficit" does not appear in this report except in the comparative statement of budgets appearing on page XIX, under the New Jersey Cash Basis Act a municipality which does not collect sufficient *cash* within a given year to meet all expenditures and required payments, including amounts owing to the county and local school districts, finishes the year with a cash deficit. This cash deficit must be included in the budget of the next succeeding year, which requirement serves to keep a budget in balance, not only from a mathematical standpoint but from a cash standpoint. It will be noted that municipalities have incurred collective deficits running as high as \$8,000,000, although the cash deficit for the year 1952 was only \$49,833.

Cash Basis of Operations

Under New Jersey statutes, cash basis refers to a plan of budgetary operation whereby the collection rate of the preceding year is applied to the total tax requirement and the levy overlaid to an extent which will produce sufficient cash from current collections to balance the budget (and requirements). The overlay is represented by a "Reserve for Uncollected Taxes." However, the "Reserve" appearing on the appropriation side of the budget may be offset in whole or in part by a revenue from delinquent taxes.

The cash basis in its simplest terms is the determination of the amounts of cash revenues available for expenditure from other than a new tax levy and the amount of the new levy needed to produce the additional cash required in order to meet the obligations of the fiscal year; the amounts of cash receipts from the new tax levy and all other available revenues being determined on the basis of actual experience during the next preceding fiscal year.

From the above, it follows that if the municipality's obligations for the new fiscal year amount to \$100 and if there are available on the basis of the next preceding fiscal year, revenues of \$40 to be received in cash from sources other than a new tax levy, it would be necessary to receive in cash during the fiscal year the sum of \$60 from the new tax levy and if 80 cents of each dollar of tax levied in the next preceding year was collected in cash during such year, then \$75 of new taxes must be levied in order to produce the required \$60 referred to above.

The objectives of the cash basis are twofold: (1) to provide sufficient cash to meet all current obligations of the municipality in cash as and when they are payable; and (2) to reduce the interest cost of bonds issued to meet the cost of capital expenditures by reason of improved credit position.

At the present time, all municipalities and counties prepare cash basis budgets.

Reserve for Uncollected Taxes

The reserve for uncollected taxes is in effect a balancing figure in every municipal and county budget which will, based upon the estimated collection of the current levy, provide the cash required for the operations of the municipality, debt service, and mandatory payments to the State and county. While the reserve is computed as an overlay on the current tax levy, it only represents an actual overlay to the extent that the revenues from delinquent taxes and liens fail to produce sufficient cash to offset the reserve for uncollected taxes. In other words, there is a distinction between the "Reserve for Uncollected Taxes" and a "Reserve for Uncollectible Taxes." The former represents the amount required to balance the budget from a mathematical standpoint, while the latter represents an amount required to be raised currently to meet a loss in taxes due to non-collection. In those cases where the reserve for uncollected taxes is in excess of the anticipated receipts from delinquent taxes, the budget is actually subject to an overlay, but in those cases where this reserve is less than the estimated receipts from delinquent taxes, the result is the reverse.

Current Finances

A condensed current or operating balance sheet prepared as of the end of the year is shown for each municipality. This current balance sheet captioned "Current Finances, December 31, 1952," reflects current cash, taxes and other receivables, cash liabilities, reserves and surplus revenue. State Highway Grants in Aid, due and owing the municipality, have been treated as part of the Surplus Revenue of the municipality, thus this item is now shown separately. This statement is a true index of the current financial position of the municipality.

Per Capita Figures

Following the plan of previous reports per capita figures for Municipal Functions, Debt Service, Total Tax Levy and Gross Capital Debt are shown on the sheet setting forth the financial picture of the municipality. It is believed that this facilitates following the per capita figures and the pertinent source. 1950 census figures have been used in these computations.

COMPARATIVE STATEMENTS AND SUMMARIES

TABLE 1

TOTAL TAXES LEVIED FOR ALL PURPOSES—AMOUNTS OUTSTANDING AND TOTAL ACCUMULATED TAX TITLE LIENS

The statement which follows herewith is based on delinquencies after giving effect to collections, cancellations, and transfers to tax title liens. The total outstanding taxes are taken from unaudited figures. In certain instances a small number of districts are not included in the total; the amount involved, however, is not sufficient to affect the statistical value. The total Accumulated Tax Title Liens do not include Foreclosed Property.

(Representative years, amounts rounded to nearest dollar)

Year	Total Taxes Levied for all Purposes	Amount of these Levies Dec. 31st of the Current Year	Dec. 31st of the Second Year	Outstanding Dec. 31st of the Third Year	Total Accumulated Tax Title Liens Dec. 31st Each Year
1933	\$228,914,420.	\$92,487,000. 40.40%	\$41,061,000. 17.94%	\$17,776,000. 7.77%	\$30,862,000.
1938	256,464,972.	56,034,000. 21.85%	17,822,341. 6.95%	8,138,603. 3.17%	85,261,000.
1943	250,421,882.	21,581,003. 8.62%	5,923,480. 2.26%	2,314,638. 0.92%	74,583,303.
1948	338,226,772.	18,624,086. 5.51%	2,073,832. 0.61%	1,829,777. 0.54%	41,350,596.
1949	360,538,909.	20,333,342. 5.64%	3,530,402. 0.98%	1,681,387. 0.47%	34,684,507.
1950	369,840,487.	19,794,225. 5.35%	3,069,243. 0.83%	1,351,388. 0.37%	32,485,545.
1951	400,785,352.	20,285,382. 5.06%	2,756,949. 0.69%	29,282,820.
1952	439,519,528.	21,234,703. 4.83%	24,756,177.

TABLE 2
CASH COLLECTIONS OF CURRENT LEVIES

The statement which follows shows the percentage of cash collections of the current levy for the years 1946 to 1952, inclusive. This statement is of interest as it reflects the variations between delinquencies and cash receipts. It is interesting to observe that the variation due to transfers to liens, abatements, cancellations, etc., does not run over 2½% and has not dropped below 0.98%.

(Representative years, amounts rounded to nearest dollar)

Year	Total Tax Levy	Cash Collections	% Levy Canceled, Abated or Transferred to Liens	Outstanding December 31st
1946	\$267,307,000.	\$249,397,000. 93.30%	0.98%	\$15,285,000. 5.72%
1947	300,668,000.	277,377,000. 92.25%	2.03%	17,225,000. 5.72%
1948	338,226,772.	314,058,953. 92.85%	1.64%	18,624,086. 5.51%
1949	360,538,909.	335,120,122. 92.94%	1.42%	20,333,342. 5.64%
1950	369,840,487.	344,363,319. 93.11%	1.54%	19,794,225. 5.35%
1951	400,785,352.	375,852,639. 93.78%	1.16%	20,285,382. 5.06%
1952	439,519,528.	413,893,770. 94.17%	1.00%	21,234,703. 4.83%

TABLE 3
FORECLOSED PROPERTY AND PROPERTY ACQUIRED BY DEED

A statement follows herewith showing the asset value of foreclosed property at the end of 1952 and four preceding years. This statement is of interest when compared with the amount of tax title liens outstanding.

1952	\$70,081,864
1951	70,246,909
1950	71,973,258
1949	74,655,285
1948	66,110,112

STATEMENT OF MUNICIPALLY OPERATED UTILITIES FOR THE YEAR 1952

This statement, because of its volume, appears at the back of the report, beginning with page 569. Comments regarding the method of operating municipally owned utilities will be found on page XII.

TABLE 4

TOTAL GROSS AND NET DEBT OF MUNICIPALITIES AND COUNTIES

The total gross debt of municipalities and counties, the total net debt and the percentage that such debt bears to the average assessed valuations of 3 preceding years' real property follows. This information is in comparative form for the representative years and reflects the overlapping debt of counties and the several municipalities located in each county. Figures were taken from the Annual Debt Statements filed with the Division by the chief financial officer of the respective governing bodies.

County	Gross Debt		(1 & 2) Total	Net Debt		(1 & 2) Total	% of Net Debt			3-Year Average Assessed Valuations
	(1) Municipal	(2) County		(1) Municipal	(2) County		(1) Mun.	(2) Co.	(1 & 2) Total

REALIZED	\$569,117,590.58	\$521,644,157.72	\$478,883,167.84

TABLE 8

The following tabulation shows the population of all municipalities by rank according to the 1950 census. Using this and the population figures appearing at the top of the page setting forth the details pertaining to each municipality, will enable anyone to review the finances of municipalities of comparable population.

**POPULATION, MUNICIPALITIES OF THE STATE OF
NEW JERSEY U. S. 1950 CENSUS**

<i>Municipalities</i>	<i>Population</i>	<i>Municipalities</i>	<i>Population</i>
Newark city	438,776	Bridgeton city	18,378
Jersey City city	299,017	New Hanover twp.	18,168
Paterson city	139,336	Summit city	17,929
Trenton city	128,009	Roselle boro.	17,681
Camden city	124,555	Bergenfield boro.	17,647
Elizabeth city	112,817	Ridgewood twp.	17,481
East Orange city	79,340	Rutherford boro.	17,411
